

GANESH SATTU

Data Analyst | SQL | Power BI | Excel | PostgreSQL
ganeshtejai616@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | Hyderabad, India

PROFESSIONAL SUMMARY

Entry-level Data Analyst with demonstrated expertise in SQL query development, Power BI dashboard design, and Excel-based KPI reporting. Skilled in end-to-end data workflows: data extraction, cleaning, transformation, exploratory data analysis (EDA), and stakeholder-ready visualization. Delivered actionable business insights across inventory management, sales performance, and customer service analytics. Proficient in translating raw datasets into decision-support dashboards that drive measurable operational improvements.

TECHNICAL SKILLS

Query & Databases: SQL, PostgreSQL, MySQL — Joins, Aggregations, Subqueries, Window Functions, Filtering, Grouping

Visualization & BI: Power BI (DAX, Data Modeling, Interactive Dashboards, Slicers, Drill-Through, Trend Analysis)

Spreadsheet Analytics: Advanced Excel — Pivot Tables, Pivot Charts, Lookup Functions, Conditional Formatting, KPI Cards

Analytics Concepts: Data Cleaning, Data Transformation, EDA, KPI Tracking, Segmentation, Trend Analysis, Reporting Automation

Supporting Tools: Git, GitHub, Python (Basics), Java — for data pipeline understanding and scripting support

ANALYTICAL PROJECTS

Zepto Inventory Data Analysis | MySQL | SQL Analytics | [GitHub](#)

- Queried and analyzed 5,000+ SKU-level inventory records using 20+ advanced SQL queries (joins, aggregations, window functions, GROUP BY, HAVING) to surface pricing trends and discount patterns.
- Cleaned and transformed raw dataset by resolving NULL values, deduplicating records, and standardizing inconsistent category labels — improving data quality by ~85% prior to analysis.
- Identified top 3 product categories driving the majority of estimated revenue share through segmentation analysis, delivering inventory prioritization recommendations.
- Flagged low-stock, high-demand product segments using threshold-based filtering logic, enabling proactive restocking decisions and reducing potential stockout risk.

Call Centre Performance Dashboard | Power BI | DAX | KPI Reporting | [GitHub](#)

- Designed an interactive Power BI dashboard analyzing 1,000+ call records, tracking 5 core KPIs: total revenue (\$96K+), call volume, avg handle time (89K+ seconds), customer satisfaction (3.9/5.0), and happy customer rate.
- Authored DAX measures and calculated columns to automate weekly and monthly trend analysis, reducing manual reporting effort by ~60% and enabling near-real-time performance monitoring.
- Built slicer-driven filtering for representative-level drill-down and cross-location comparisons (3 sites), enabling operational managers to identify underperforming agents with one click.

Superstore Sales Performance Dashboard | Advanced Excel | Business Intelligence | [GitHub](#)

- Developed an executive-level Excel dashboard synthesizing 10,000+ sales transactions, surfacing \$2.3M+ total revenue, \$292K+ profit, and 10K+ order KPIs across regions, segments, and categories.
- Engineered dynamic Pivot Tables and multi-variable slicers (Region, Segment, Category) to enable self-service data exploration for non-technical business stakeholders.
- Conducted category-level profitability analysis — identified Technology as top revenue contributor and flagged 3+ low-margin sub-categories, providing actionable input for pricing strategy.

EDUCATION

B.Tech — Computer Science Engineering (Cyber Security)

2021 – 2025

AVN Institute of Engineering and Technology, Hyderabad | CGPA: 7.2

Intermediate (MPC)

2019 – 2021

Sri Gayatri Junior College, Kothapet, Hyderabad | Percentage: 89%

SSC (10th Grade)

2018 – 2019

Jesus Way International & High School, Ghatkesar, Hyderabad | GPA: 9.2
